

CONTROLLERS - PRE-WIRED MATERIAL

Advanced Solutions

SystemLift was founded by engineers who have been operating in the lift field for many years. Attention to customer requirements and technical expertise have led to a range of high-tech and reliable products, created to make the installation easier and safer.

The System Lift product line is able to satisfy any market need for different uses, with high standard quality solutions that are always at the forefront.

EASY-TRONIC is a microprocessor control board: simple, versatile and ready to meet special demands:

- It's able to handle all kinds of hydraulic and traction systems;
- It's supplied with an open or closed ring frequency changer;
- It's available for all kinds of operations: universal, simplex down, simplex up/down, duplex, triplex;
- 8 number of stops are included in the basic solution (more can be added);
- It has a serial interface between controller and car; now available with serial interface also at the floor;
- It can be monitored and fully controlled remotely via PC for managing traffic situations at any time;
- The encoder system allows to drive systems at a speed up to 2.5 m/sec;
- Also available with cabinet for MRL hydraulic or traction lifts.

Pre-wiring and Push-buttons

System Lift engineers were the first in Italy to develop pre-wired products.

Pre-wiring facilitates installation by achieving a perfect result together with a substantial time saving. The installation kit is complete in every detail, making the fitting of the electrical components in the car and in the shaft simple, fast and functional.

A modern and simple design characterizes the floor and car push-button panels, available in horizontal, vertical and standard layouts. A wide range of finishings (stainless steel, aluminium and skinplate) will satisfy any requirement.

Quality, professionalism and delivery on time are System Lift's guidelines.

The company is committed to developing more and more innovative and technologically advanced solutions maintaining high quality standards levels.

System Lift is highly customer-oriented providing excellent pre and post sales service on both technical and commercial levels.
